

NOTICE – 2024/2025

NOTICE: All Riparian's and Users of Golden Lake

Renfrew Power Generation (RPG), and the Golden Lake Property Owners Association (GLPOA) would like to give notice to Riparian's and all other water users, especially those with watercrafts, that water levels will begin to be *gradually* lowered on Golden Lake beginning October 15, 2024. The drawdown will be carried out the same as years past and is necessary to best prepare for the anticipated high water that comes during Spring Freshet. Prior to making recreational plans, lake users should familiarize themselves with the water level regime to avoid areas that may become unsafe for boating, ice fishing or snowmobiling as water levels gradually decline. Boat removal could be challenging if left too late.
